

# HEAVY DIESEL CONSTRUCTION TECHNOLOGY

## HEAVY DIESEL PROGRAM

Highly skilled workers are in high demand to keep equipment running in the field. Washburn Tech now has the Midwest's premiere program in heavy diesel construction technology.

Diesel technology is a high tech, hands-on transportation career that is growing rapidly. Thanks to our corporate partners, CASE Construction and Victor L. Phillips Company, Washburn Tech's new training lab houses the latest technology in the field. Students put their hands directly on top-shelf equipment that prepares them to move from the classroom to a high-pay, high-demand career. A full-time student can complete the program in two semesters and earn a 48 credit hour technical certificate. Students also may choose to complete an associate or more advanced degree at Washburn University.

## CORPORATE PARTNERS

### CASE CONSTRUCTION

CASE sells and supports a full line of construction equipment around the world. Through CASE dealers, customers have access to a true professional partner.

### VICTOR L. PHILLIPS CO.

The independently-owned heavy equipment company has been in business for more than a century and has six locations and nearly 100 employees in Kansas and Missouri.
